To Whom It May Concern:

We have used Dynamic Data Management for our bookkeeping service for the last year and a half. I do not know what we would have done without them. Among their accomplishments are getting us out from under a significant amount of debt, fixing many bookkeeping errors made by past bookkeepers, and creating a system so that every client gets billed every month.

DDM has always been willing to work with us and come up with creative solutions to problems. For example, at the time that DDM started working with us, the attorneys' timesheets were all handwritten, which were difficult to read, so they created a computerized timesheet. The computerized timesheets are a major time-saver for both the attorneys and the support staff.

I would strongly and without reservation recommend DDM. Please feel free to call me with any questions you may have.

Sincerely,
