To Whom It May Concern:

Dynamic Data Management has been handling the day to day general bookkeeping services for our company for approximately two years now. They take care of our accounts payable, accounts receivable and payroll requirements.

Throughout our relationship with Dynamic Data, we have been pleased with their professionalism and high level of expertise. I can rely on them to take care of anything we require in a friendly and timely manner.

In addition to the face to face or phone availability, they also have an active website where I can access all our firm's customized financial reports, current bank balance and details regarding recent banking transactions. This is particularly helpful during evening and weekend hours.

I would recommend Dynamic Data's services to anyone seeking a professional firm to represent them in all the above matters.

Sincerely,

Clare Herrmann
